

YPAC DAY #1

On Tuesday, 23.03.2021, the official ypac week started! Even though we would have loved to have gone to the snowy village of Pestalozzi in Trogen, this year, the entire ypac will be held online, to ensure our safety from the pesky corona virus. The opening ceremony began with a casual welcoming and opening speech by the ypac presidents, Jonas and Antonia. A number of greetings were held after that, each one full of advice and encouragement, for both new and veteran members, on this year's important topic and how to make the most out of this week.

Our breaks consisted of music intermissions, held by the swiss electro pop band *Sort of Sad*, which was a perfect way for the delegates to relax.

The part we were all looking forward to the most, were the group introduction videos. They were all unique, fun and interesting; through them we met and learned more about our "associates" and their creative sides. Although we experienced some technical issues at the end and some programme changes, the first day ran smoothly and we are all looking forward to tomorrow.

Lea Šemen, press group member of the delegation from Kamnik.
